5th International State-of-the-Art Congress

Groningen, The Netherlands, April 23-25, 2014

REHABILITATION: MOBILITY, EXERCISE & SPORTS

www.rehabmove2014.com

Rehabilitation: 'Mobility, Exercise & Sports' is the 5th edition of our International State-of-the-Art Congress. It builds on the strong and natural link between rehabilitation and human movement sciences. High standard thematic keynote and free presentations are combined with posters and exhibition in a concise area and sociable atmosphere in the City of Talent!

Wheeled Mobility
Handcycling
Modeling
Prosthetics & Orthotics
Exercise Capacity
Daily Physical Activity
Training Strategies
FES Induced Exercise
(Elite) Adapted Sports Performance
Walking & Running

Sports Injuries
Ethical Considerations
Healthy Ageing
Robotics & Virtual Reality

University Medical Center Groningen

The 5th International State-of-the-Art Congress 'Rehabilitation: Mobility, Exercise and Sports' is organized by the Center for Human Movement Sciences and Center for Rehabilitation of the UMCG, together with the Faculty of Human Movement Sciences of the VU University in Amsterdam and the Wenckebach Instituut of the UMCG.

The theme of the 5th International Congress will provide the state of the art on (wheeled) mobility, active lifestyle, exercise, training and sports in the context of rehabilitation and adapted sports. Internationally renowned experts will present their views on the current understanding, research and practice of mobility restoration, exercise and (adapted) sports in rehabilitation practice.

Clinicians, researchers and other professionals from rehabilitation, human movement sciences and sport and exercise sciences are invited to submit their work for poster or oral presentations and/or to actively participate in this stimulating event.

See you in Groningen in April 2014!

Lucas van der Woude

Conference venue

University Medical Center Groningen.
Hanzeplein 1, Groningen.
Groningen is easily accessed by train directly from Amsterdam / Schiphol Airport.

The Netherlands

The Netherlands is a geographically low-lying and densely populated country. It is popularly known for its windmills, Delta works, cheese, wooden shoes, delftware, tulips and bicycles.

Groningen

As a lively university city in the north of the country, Groningen has the youngest average population in the Netherlands. It has a long and turbulent history, which becomes evident from the historic warehouses, courts and buildings. Experience all of this and explore Groningen!
